

Reporting of EJP SOIL publications and data

Sevinc Madenoglu

EJP SOIL WP 9

TAGEM (E mail: sevinc.madenoglu@tarimorman.gov.tr)

EJP SOIL
European Joint Programme

EJP SOIL has received
funding from the European
Union's Horizon 2020
research and innovation
programme: Grant
agreement No 862695

Scientific publication reporting times in the year:

The scientific publications are part of the communication & dissemination activities and very important indicators of EJP SOIL activities

- The reporting period  **November- January, submission at the end of January**
- will be collected **every six months during the year**
- responsibility belongs to **National Communication Representatives (NCRs) and Project Communication representatives (PCRs)**

Which scientific publications are eligible?

- produced from EJP SOIL activities
- funded by EJP SOIL budget
- WP activities of the program
- project activities

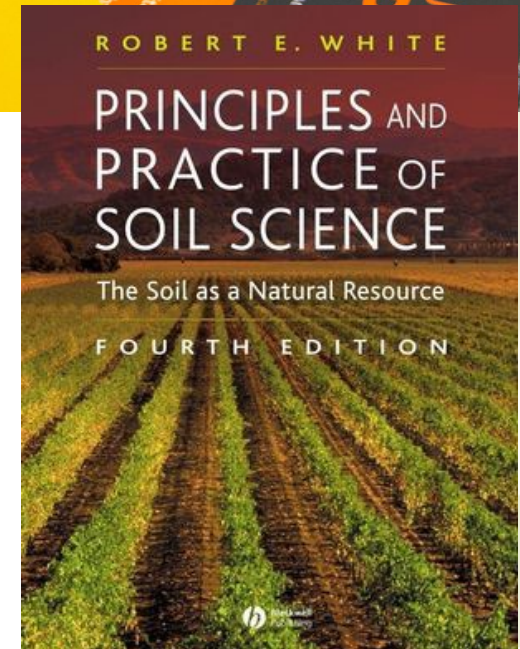

Thesis

Types:

- Article in journal
- Publication in conference proceeding/workshop
- Books/Monographs
- Chapters in books
- Thesis/dissertation
- Others

EX-TRACT: An excel tool for the estimation of standard deviations from published articles

Marco Acutis^a, Tommaso Tadiello^a, Alessia Perego^{a,*}, Andrea Di Guardo^b, Calogero Schillaci^{c,a}, Elena Valkama^d

Acknowledgments

This work is a part of the project SOMMIT: Sustainable management of soil organic matter to mitigate trade-offs between C sequestration and nitrous oxide, methane, and nitrate losses that received funding from the European Joint Programme SOIL (grant agreement ID: 862695). This study is also funded by the European Union's Horizon 2020 Framework Programme for Research and Innovation (H2020-RUR-2017-2) as part of the LANDSUPPORT project (grant agreement No. 774234), which aims at developing a decision support system for optimizing soil management in Europe. The work is also financially supported by the Doctoral School of Agriculture, Environment, and Bioenergy and of the University of Milan.

Digital mapping of *GlobalSoilMap* soil properties at a broad scale: A review

Songchao Chen^{a,b,c,*}, Dominique Arrouays^a, Vera Leatitia Mulder^d, Laura Poggio^e, Budiman Minasny^f, Pierre Roudier^{g,h}, Zamir Libohovaⁱ, Philippe Lagacherie^j, Zhou Shi^k, Jacqueline Hannam^l, Jeroen Meersmans^m, Anne C. Richer-de-Forges^a, Christian Walter^b

Acknowledgements

This work is supported by LE STUDIUM Loire Valley Institute for Advanced Studies (France). Songchao Chen received support from the China Scholarship Council (grant no. 201606320211). This work benefited from collaborations established in the framework of the EU EJP Soil "Towards climate-smart sustainable management of agricultural soils" (grant no. 862695).

Important

- please complete all sections in the template for each publication, because it can not be registered to the EC portal with missing information
- please review publications not only from 2022 but also from 2020 and 2021 for your Institution/project
- if you reach undeclared publications from previous years, please include them in this year's table
- if you have a publication that does not comply with the specified classifications, consider it as “other”.

The bar graph shows the number of scientific publication that produced from EJP SOIL program activities in 2020 and 2021.

In 2021: reported 9

published 13

Where will the publications be located?

EC Portal

The screenshot shows the 'Project Continuous Report' for project 741839 (FOSTER Plus) under the Horizon 2020 grant. The 'Publications' tab is active, showing a progress indicator with a green checkmark. Below this, there are two sections: 'Suggested publications from OpenAIRE (2 publications)' and 'Project publications (1 publications)'. An orange circle highlights the 'OpenAIRE (2 publications)' link, with an arrow pointing to it from the text 'Accept the suggested publications from OpenAIRE and add'. Another orange circle highlights the 'Project publications (1 publications)' link, with an arrow pointing to it from the text 'your project publications'. A third orange circle highlights the 'Validate' button at the bottom right of the 'Project publications' table. The table contains one entry: 'Projekt FOSTER Plus' by Brinken, Helene, with a DOI of <https://doi.org/10.5281/zenodo.887124>.

EJP SOIL Website

Knowledge Sharing

This is the online repository with open access to and availability of outputs, deliverables, and material produced by the EJP SOIL Work Packages and projects with relevance for partners, external stakeholders and end-users. The Knowledge Sharing will continuously be updated.

The screenshot shows the 'Knowledge Sharing' section of the EJP SOIL website. It features a grid of content categories, each with a representative image and a right-pointing arrow. The categories are: 'Webinar recording & slides' (with a play button icon), 'PhD School programme & material' (with a book and lightbulb icon), 'Videos' (with a video player icon), 'Publications' (with a stack of books icon, circled in red), 'National webpages' (with a world map icon), and 'EJP SOIL Glossary' (with a book icon labeled 'AZ').

THANK YOU

EJP SOIL Special issue:

Climate-smart sustainable agricultural soil management for the future

What to submit?

- Original manuscripts,
- Reviews,
- Short communications,
- Opinion papers,
- Data articles that collate, summarize and set future potential research priorities for carbon sequestration and soil health across Europe.

We seek to develop a comprehensive and wide-ranging assessment of the various strategies and methods for achieving sustainable and climate smart soil management.

EJP SOIL Special issue:

Climate-smart sustainable agricultural soil management for the future

Please provide your opinion and possible submission of relevant results on this Special Issue using the dedicated questionnaire <https://tinyurl.com/EJPSOILSI>

The European Journal of Soil Science (EJSS) is an international journal that publishes outstanding papers in soil science that advance the theoretical and mechanistic

understanding of physical, chemical and biological processes and their interactions in soils acting from molecular to continental scales in natural and managed environments,

as well as descriptions of data sets that contribute to these goals.
