Nicht sicher – CANDY

CANDY: general overview

options:

- NEWS
- C-N-P
- CANDY-22
- CANDY-21
- HUMUS 2.0
- HISTORY
- IMPRESSUM

The modelling approach is available with a complete soil process Modell (CANDY) and with a balance model simulating turnover processes in topsoil for carbon nitrogen and phosphorus (C-N-P). Both models can be used via a GUI or via batch call. Both GUIs include features to edit data, start simulations, evaluate the results and also an optimisation tool .

The “hygge” game

- What would you change at the models if you could apply some magic ?
- Do you think that there are valid models ?
- Would you like to meet again ?
