

The Soil Innovation Partnership

United by soil; driven by impact

The Soil Innovation Partnership (SIP) is a global initiative grounded in European roots that unites scientists, farmers, advisors, policy-makers and businesses to transform soil research into validated, scalable impact – through farmer-led validation, innovation, and investment.

Our mission is to unlock the power of healthy soils to restore balance between people, nature, and economy – building a resilient and regenerative future from the ground up.

From
Knowledge
to
Practice

Farmer-led validation across pedoclimatic zones

- Working in Living Labs & co-designed on-farm trials
- Socio-economic & environmental impact tracking
- Practitioner-friendly tools, guidelines & decision support
- Integration of validated practices into agricultural education and advisory systems

From
Innovation
to
Market
Readiness

Scaling Proven solutions into real-world deployment

- Identification and selection of scalable soil solutions
- Collaboration with agri-cooperatives and agri-food businesses
- Support for regulatory and policy alignment
- Acceleration from pilot to large-scale adoption

From
Impact
to
Investment

Mobilising capital for soil health at scale

- Structured dialogue with investors, insurers and agri-food actors
- Development of investable soil-health business models
- Demonstration of impact through pilots, data and monitoring
- Enablement of blended finance and risk-sharing mechanisms
- Crowding-in private capital alongside public funding

SIP invites farmer advisory firms to become a member of this growing Partnership!

Why should we become a member?

- Because you are working with soil and driven by impact.
- The Soil Innovation Partnership brings all stakeholders with this shared interest together
- Together we can learn more, move faster and create more impact.

What will SIP bring to me?

- Involvement in the Soilathon – as participant, problem-owner or observer
- Access to the latest scientific and practical insights from the worldwide community
- Connection with experts active with the same soil types as you
- A funded ecosystem to pitch your research needs
- Visibility as all members are highlighted at the online SIP platform

What does SIP expect from me?

- Participation in projects and activities, ranging from sharing of results to actual field trials. SIP projects are financed by funders; you may either co-invest or receive cost reimbursement
- SIP members invest time to stay informed. Depending on your interest this varies from 2 to 8 hours per month
- All SIP members pay a modest fee to finance the SIP secretariat

I like it but have some questions. Who can tell me more?

The SIP team is happy to discuss your involvement. Please reach out to Saskia Visser (Saskia.Visser@climate-kic.org) or Raisa Gerasina Chaix (raisa.gerasina@climate-kic.org) for more information.

I want to become a member, what's next?

Confirm your interest through this link: ejpsoil.eu/join-the-sip
Or scan the QR code

June 30th a final decision GO/NOGO will be taken a.o. based upon expressed interest of future members.

You will be informed on the decision and SIP will invite you to sign a membership contract.
